

The Kemet P100 cut-off machine

Width: 270mm
Depth: 300mm
Height: 280mm
Weight: 8.5 Kg

360° swivelling chuck

The Kemet P100 is a high quality, bench mounted abrasive cut-off machine that can be used on a large range of hard materials such as ceramics, rocks etc. A longitudinal and rotating adjustable specimen carrier (with chuck) allows the materials to be cut on a wide range of angles. The cutting disc is continuously cooled by immersion.

A micrometer with a 20mm travel controls the chuck holding the sample and allows for adjustment of the cuts.

Supplied with Ø100mm Diamond Cut off Disc, 360° swivelling chuck, large size sample chuck, 2 flanges for wheel Ø100 and Ø125mm, 5 aluminium plates (60x25mm), dressing stick of Diamond Disc and 5 wax sticks.

Specification

- Precision low and variable speed cut off machine
- Machine fitted with a protective transparent hood
- Diamond or Resin bonded disc: 100mm diameter
- Micrometer adjustment for precision
- Cutting capacity: 20 x 20mm (new disc)
- Speed: 10 to 1000 rpm
- 220V, single phase, 55W
- Cooling tank
- Extensive choice of accessories
