

The Kemet T400 cut-off machine

Width (without control panel): 800 mm
Depth: 1300 mm
Height: 1800 mm
Weight: 650 Kg

The Kemet T400 cut-off machine is an automatic, high capacity cut off machine, allowing large samples to be cut to strict metallographical specifications. The automatic control of feeding speed advance following cutting, combined with pulse cutting technique, allows fast and regular high quality cuts, in any material.

The touch screen control panel and LCD screen allows for fast and simple storage of all parameters.

The 160 litre cooling tank and powerful tank allows for efficient spraying during cutting. 1 spray nozzle is on the cut off wheel; 2 spray nozzles are on the work piece.

Supplied with tank and pump, 5 cut off wheels and anti rust liquid.

Specification

- High capacity automatic cut off machine
- Cut off wheel Diameter: 400mm
- Distance wheel/table 190mm
- Cast iron table 400 x 400mm with 6 linear T-slots and 5 transversal T-slots
- Variable Speed Rotation: 1500 rpm to 3000 rpm
- Touch pad control panel with LCD screen
- Pump and 160 litre tank
- Spray nozzle for cleaning
- High accessibility to the large cutting chamber for easy loading of sample.
- 400V, 3 phase, 50Hz
- Power: 5.5 kW
